

Facilities Section

APPLICATION FOR STATE FUNDS

Before the beginning of each fiscal year school systems that wish to apply for State capital outlay funds should contact the **state facilities consultant assigned to their system**. The consultant assists system personnel in these areas:

1. Review of needs and priorities in the local facilities plan.
2. Determination of eligibility of each project.
3. Determination of the type of funding for each project.
4. Completion of forms and documents necessary to secure state funds.
5. Calculation of the system's required local effort.

NOTE:

If a system chooses not to make an application for state funds in any given fiscal year the funds will accrue and will be available to the system in subsequent years.
